HIGHWAYS CREATE YOUR WORLD

POINTS FOR THE PLANET

ECO-FRIENDLY BAMBOO

Our vehicles and blocks are made from bamboo, which is often dubbed as "nature's wonder grass" and is renowned for its rapid growth, durability, and remarkable strength-to-weight ratio

DURABLE SILICONE

Using silicone to make our roadway offers several environmental benefits including it's high durability. Our unique road design also features inlayed road markings as opposed to printed, which means it cannot be rubbed off over time

UPCYCLED CARDBOARD

Encouraging the use of upcycled carboard to create small world scenery promotes the ethos of sustainability and resourcefulness and instills a sense of environmental responsibility from an early age
