Let's Stick With Bees

We are the only company on the planet repurposing our glue sticks into planters, helping schools take a powerful step towards achieving Net Zero!

This planter was made from NEXUS Glue Sticks.

Learn Play Nexus is transforming used glue sticks and refills into eco-friendly planters that children use to grow sunflowers for their schools and communities, creating vibrant "sunflower highways" that support bees and local ecosystems. Through the Eco Edd Stick With Bees programme, schools reduce waste and cut the carbon footprint of 2,000 glue sticks to just 3 kg of CO₂. This is a hands-on learning experience that brings sustainability into the classroom, inspiring children to care for the environment and showing that small actions can make a big difference.
